

WORLD SERIES LABELS TOP OPAK PERMANENT

White Opaque Paper with a permanent adhesive

A plain white matt paper with an opaque black coating on the reverse side.

The same range of overprinting methods & applications as our plain white permanent stock products plus the benefit of a label that can cover up incorrect printed information on, price labels, bar codes, ingredients on packaging & leaflets etc without any show through.

Face material properties

Grammage	85 gsm
Caliper (thickness)	81 microns

Adhesive

A permanent, black, acrylic based adhesive with good tack & adhesion on a wide range of surfaces. The high heat resistance of the material allows clean running through laser printers.

Minimum application temp.	+5°C
Storage range once applied	-20°C to +60°C

Backing

A bleached kraft paper with good lay-flatness & stability

Thickness	78 microns
Grammage	75 gsm

Environmental

Paper components are either ECF or TCF grade manufactured using pulp from sustainable, managed resources. All dimensions are nominal target specifications but may vary. All products within our range are manufactured to ISO 9001:2015 and BRC standards, the factory is also fully FSC certified. The raw material laminates are also made to the same ISO standards as above and to ISO 14001. The product packaging is designed to maintain original ideal RH levels and will survive being stored in a wide range of temperatures, however, it is essential that the material is allowed to recover to normal print room temperatures for a min of 48 hours before use. Best print room conditions are 20 deg C and 50% RH.

Markets and Uses

Used for over labelling as the Opaque is a Block out adhesive so can cover errors/amendments on literature, letterheads etc, without the expense of re-printing. Also used for return labels which can over label original address without original showing through the new label.
